

Case Study | Telestroke

Avanti Hospitals and Keck Medical Center/USC

Local Community Hospital Serving Diverse Patient Population

Los Angeles, CA

Main Challenge

Avanti desired its 4 hospitals to become accredited stroke centers, but lacked neurologists on staff to perform the service and had difficulty in attracting full-time staff to facility.

Actions

Already a Martti Client

Cloudbreak brokered partnership via its marketplace between Avanti and USC so Avanti could receive academic quality telestroke consults that integrate language services.
